Internship

APSSDC AWS Internship

- Worked with AWS services including EC2, S3, IAM, VPC, and CloudWatch.
- Built and deployed cloud-based applications through hands-on labs.
- Gained practical experience in cloud architecture and deployment.

Projects

Audio-based Deepfake Detection System

- Developed a deep learning model using ECAPA-TDNN to classify real and synthetic speech.
- Focused on detecting AI-generated voice manipulation.
- Applied feature extraction and model training techniques for audio classification.

CI/CD Pipeline using Jenkins & Docker

- Designed and implemented an automated CI/CD pipeline integrating Git, Jenkins, and Docker.
- Deployed containerized applications on AWS EC2.
- Improved deployment efficiency through automation.

Online Quiz Management System (AWS)

- Developed a cloud-based web application using AWS services.
- Implemented hosting, Amazon S3 storage, and IAM-based access control.
- Demonstrated scalable cloud architecture deployment.
